Welcome to the 2021 All Breeds Cattle Tour!

What a crazy year for North Dakota. The extreme drought and market transparency have topped news headlines all year long. Let's push this year's challenges aside as we focus on a fantastic tour. Our tour hosts are looking forward to the 34th annual All Breeds Cattle Tour and are excited to share with you what they have been up to this year.

The quality of cattle in the Devils Lake area have us with a full two-day tour. We have 11 stops featuring 14 breeders. These top-notch breeders represent a variety of breeds including, Angus, Hereford, Red Angus, Charolais, Simmental and SimAngus[™].

We would like to recognize our sponsors, who are great supporters of our operations and our industry. Thank you, sponsors! And, a big thank-you goes to all our tour hosts who worked hard to bring this tremendous tour together, despite the drought struggles that we all faced this year.

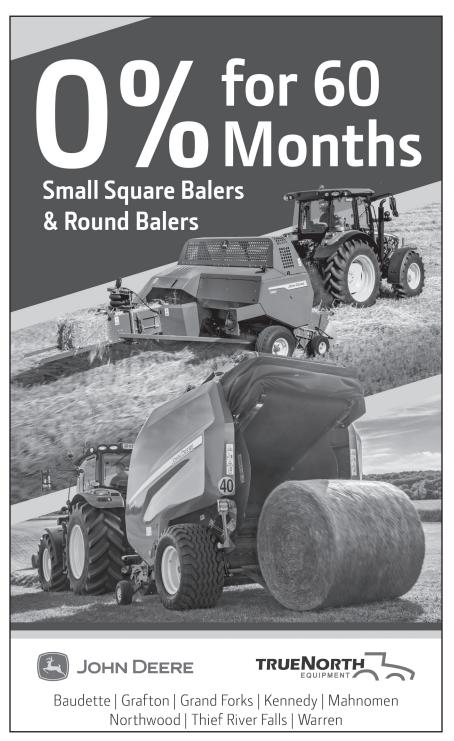

We look forward to a two-day excursion around the Devils Lake area to relax and visit with fellow cattle producers and agribusiness professionals on the 34th annual All Breed Cattle Tour.

Sincerely,

Karissa Daws & Steve Gilje

MIDWAY POLLED HEREFORDS Tust Stop. Oct. 4

Welcome to Midway Polled Herefords and the 2021 All Breeds Cattle Tour!

Midway Polled Herefords is a sixth-generation family farm and ranch that began in 1910. My dad, Doug Smith, founded our registered Polled Hereford herd in 1953, and my mom Ann is still an active part of the ranch.

Our goal is to produce big, rugged 2-yearold-bulls and raise them with longevity and survivability in mind. We only select the top one-third of the bull calves from our 200 registered cows. We also produce replacement heifers that grow into big-volume, high-producing cows. We begin selling bulls by private treaty in January and replacement heifers in February. A yearly catalog is available upon request by mail or online.

We also have 170 commercial cows consisting of Hereford and black Angus ge-

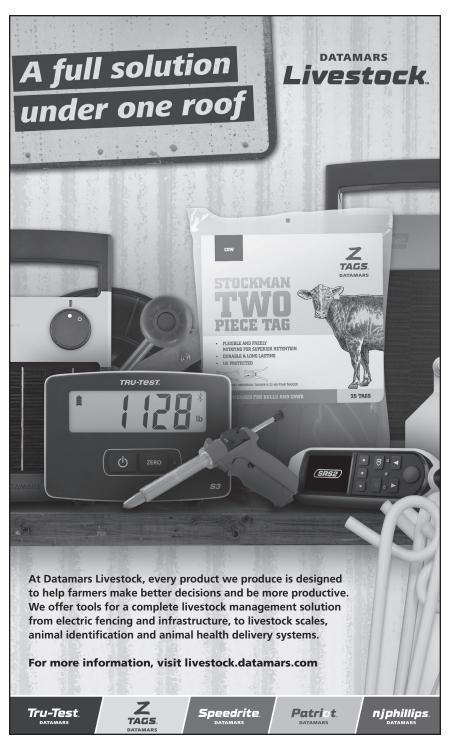

netics. These cows produce a large group of black baldy replacement heifers that are offered for sale yearly.

We are happy to have our daughter Whitney and her husband Jake, along with their kids, Will and Andie, here on the ranch with us. They are an important part of the team that makes our operation work.

Visitors are always welcome at Midway Polled Herefords. Thanks for coming to see us and for your interest in our cattle.

POLLED HEREFORM

MIDWAY POLLED HEREFORDS Bill & Karen Smith Jake, Whitney, Will & Andie Burkhardsmeier 7480 26th St. NE Sheyenne, ND 58374 (701) 996-3300 midwayph@gondtc.com

TOPP ANGUS Scoul Stop. Det. 4

Topp Angus is a purebred Angus cattle operation located north of Grace City, operated by Paul Topp, his wife Jess, and their children, Brooke, Hudson, Sienna and Holden.

A third-generation seedstock producer, Topp Angus began with a comprehensive embryo transplant program for TC Ranch in Franklin, Neb.

After careful analysis of their program, the decision was made to purchase the fall-calving herd from TC Ranch, which included a strong base of cow families currently standing at Topp Angus. The herd has grown and, today, includes 350 cows with a spring-calving herd (January and February) and a fall-calving herd (August and September). We host a production sale the first Thursday in February, which includes 130 spring-and fall-born bulls. We also host special opportunities throughout the year to purchase high-quality replacement females.

The foundation of our cowherd is built on consistency. We have a strong breeding base and elite genetics to strengthen our annual offering to you. We develop our cattle to ensure they can hold up in any breeding environment and move your breeding program forward. This is done through careful research, planning and constant attention to detail to guarantee nothing is overlooked. We will not chase the latest fads, but continue with balanced genetics that will improve your herd for many generations to come. We do not believe in keeping 50 percent of our bulls and heifers; we believe in a cowherd that never misses.

We are very thankful for the opportunity to be a seedstock Angus producer offering balanced, efficient and performance-driven genetics. We appreciate the time you've taken to attend the All Breeds Cattle Tour and look forward to your conversations and herd visits any time throughout the year.

P-One[®] - the 1st Ingredient[®]

Time to Think Differently:

The microbiome in every cow is different, yet all are fed the same TMR and expected to perform the same. Fed daily, P-One™ has the **Smart**<u>bacteria</u> to shift the microbiome's profile, making it more unified so the cows benefit similarly from the same TMR.

The branded strains of **Smart**<u>bacteria</u>, found only in P-One[™], optimize energy transport through efficient carbohydrate metabolism. Thus stabilizes and maintains rumen pH, making P-One[™] - the 1st Ingredient[™].

> Providing a more cost-effective, hands-on approach to nutrition, Priority IAC brings a forward approach to formulating rations.

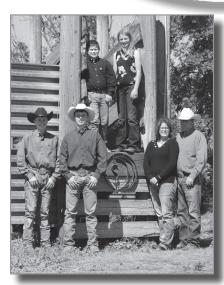

> > The only company bringing the fields of MICROBIOLOGY & NUTRITION TOGETHER

Justin and Nathan Spickler are proud users of P-One™

SPICKLER RANCH NORTH Thud Stop. Oct. 4

Welcome to the 2021 North Dakota Stockmen's Association's All Breeds Cattle Tour and to Spickler Ranch North!

Spickler Ranch North is a third-and fourth-generation purebred Angus seedstock operation. Justin and Sara Spickler own and operate Spickler North along with our four children Wyatt, 16; Will, 15; Jessa, 12; and Watson, 11. We truly are a family operation, with each family member having specific jobs and tasks that contribute to our success.

Our cowherd consists of 600-plus spring-calving cows, along with a group

of fall-calving cows. We hold an annual production sale each November, when we offer coming 2-year-old bulls, bred heifers and bred cows. The most recent addition to our sale offering are commercial heifers purchased from our customers, freeze branded, artificially inseminated and developed by us. In 2012, with the help of the NDSA, we built a 999-head feedlot. We use the feedlot for sale cattle development and to finish nearly all of the cattle that we cull. In turn, we market them directly to a packing plant. This task and the end result give us tremendous insight into how our cattle perform in the feedlot and at the plant.

Spickler Ranch North also owns a small band of Quarter Horse mares. We have been Quarter Horse breeders since 1988. Our bloodlines include Doc Bar, Poco Bueno, King, Cutter Bill and, our current stud purchase from the Eslinger operation in Ashley, a red roan Peptoboonsmal-bred horse.

We are thankful for the opportunity to host you on this tour. Please do not hesitate to contact us anytime!

FARNSWORTH ANGUS RANCH Third Stop. Oct. 4

Welcome to the 2021 All Breeds Cattle Tour!

Farnsworth Angus Ranch is primarily a commercial cow-calf operation and also features a registered Angus herd managed by Evan Farnsworth.

In 1917, Theodore Ellingson, Evan's great-grandfather, started the cowcalf operation. He passed away in 1942, leaving his wife Cora. The commercial cows were sold to Archie Campbell after Theodore's passing. The commercial bred heifers were given to their daughter Avenell Ellingson Farnsworth, Evan's grand-

mother. Avenell and husband Bruce built their commercial cowherd with the start of the 10 bred heifers. Then, the commercial cowherd was passed down to Ed Farnsworth. Ed retired from ranching in 2017, and Evan has since taken over the operation.

Evan started the registration operation in the fall of 2005. At the time, he was working for Spickler Ranch. There, he was given the opportunity to purchase S Sarsaparilla 502, the foundation female for his registered operation.

Farnsworth Angus Ranch sells bulls private treaty in addition to consigning bulls to the North Dakota Angus State Select Bull and Heifer Sale and the North Dakota Bull Test.

Welcome to Jallo Angus Ranch and the 2021 All Breeds Cattle Tour!

Jallo Angus Ranch originally started as a 4-H project in 1974, when Darrell purchased his first Angus heifer. As Darrell expressed an interest in the seedstock industry, he went to work for Earl Hofstad of Ramsey Angus of

Starkweather and later purchased 40 head of registered Angus females from Hofstad. These females were the original foundation of the Jallo Angus Ranch herd. Today, the ranch has developed into a multi-generational operation. The Jallo family includes Darrell's parents, Harold and Carol, wife Deb, and their children Jamie (husband Erik and son Emmett), Jessica (husband Taylor and sons Orrin and Jasper) and Jason, who works alongside Darrell on the ranch.

The herd consists of 350 Angus mother cows. Jallo Angus Ranch has an extensive artificial insemination and embryo transfer program that allows them to improve genetics through the raising of females and herd bulls, as well as the purchase of high-quality bulls that complement their program. The ranch has embraced DNA genomic Expected Progeny Differences (EPDs). All stock is fed and bulls are developed on the ranch. In addition, anything that goes to market is finished on site. Jallo Angus Ranch hosts an annual production sale on the third Sunday in January. The 43rd annual sale will be held on Jan. 16, 2022, and will feature approximately 80 fall- and spring-born bulls and a select group of bred and open females.

Always striving to improve their breeding program, Jallo Angus Ranch's mission is to breed for functional cattle that cover everything from eye appeal, carcass quality, performance and longevity. They strive to stay true to their breeding program goals and raise cattle that go out and work, whether that's in the pasture, feedlot or even in the showring.

Jallo Angus Ranch also runs a farming operation comprised of wheat, corn, edible beans, soybeans and oats near Fordville.

Visitors are always welcome!

JALLO ANGUS RANCH

BINA CHAROLAIS

Welcome to the All Breeds Cattle Tour!

Bina Charolais is a seventh-generation family farm that originated in 1896. The farm consists of Lane and Vicki and their daughters Desiree, Deitra, Denae (husband Kyle and daughters Kennedy, Gentry and Brinkley) Stern and Derissa (husband Dustin and son Ian) LaFleur.

In 1979, two bachelors offered their checkbook to Lane to buy seven Cha-

rolais cows and pay them back when he had the money. This transaction started the Bina Charolais registered herd, as well as a relationship that grew. Lane eventually bought out their Charolais herds.

Today, the herd consists of 90 purebred Charolais and 30 red-factor Charolais spring-calving cow-calf pairs. We do an extensive 30-day artificial insemination, with natural heat detection. This helps us to improve our genetics in order to produce high-quality individuals to sell to our customers. We also keep back 10 to 15 replacement heifers a year to improve the genetics of our herd. Fifteen years ago, we started in the red-factor Charolais to give our bull customers an opportunity to keep their black and red hides, while getting the extra pounds and muscle that Charolais put into their offspring. We also sell a handful of show heifers, which have been successful around the country, and replacement heifers. We look for our heifers to go to our customers and be sound and functional, while offering strong maternal traits.

We host our annual Bina Charolais Powerhouse Bull Sale the third Tuesday in February. Our 27th annual sale will be Feb. 15, 2022, in Jamestown. We sell our top 30 to 35 bulls, the ones we feel have the ability to meet our customers' requirements of adding pounds, muscle and profit in their pocket. One of our favorite sayings is, "We won't sell it to you if we wouldn't use it ourselves." Our bull sale has been ranked in the top 10 Charolais bull sales in the nation for the last 10 years. In 2007, we won the pen-of-three bulls at the National Western Stock Show in Denver, Colo.

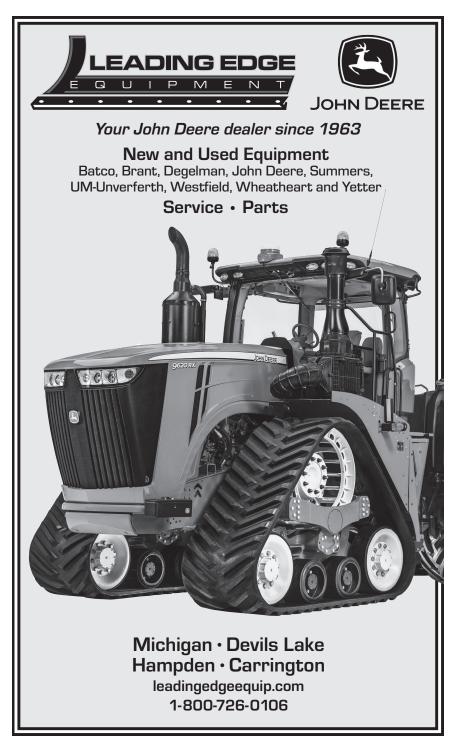

Besides raising Charolais cattle, we raise wheat, canola, oats, corn and pinto beans.

Here at Bina Charolais, we strive to produce high-quality cattle not only for the purebred industry, but also for commercial cattlemen. When you use Bina Charolais genetics, you're not just a customer, but a friend. If you are ever in the area, we would love for you to stop by the farm and visit us about the great white breed.

We hope you enjoy the stops and look forward to seeing you down the road!

BINA CHAROLAIS

Lane & Vicki Bina 11168 60th St. NE Lawton, ND 58345 (701) 655-3598 binachar@polarcomm.com

ELLINGSON SIMMENTALS Tifk Stop. Oct. 4

Welcome to the 2021 All Breeds Cattle Tour and Ellingson Simmentals!

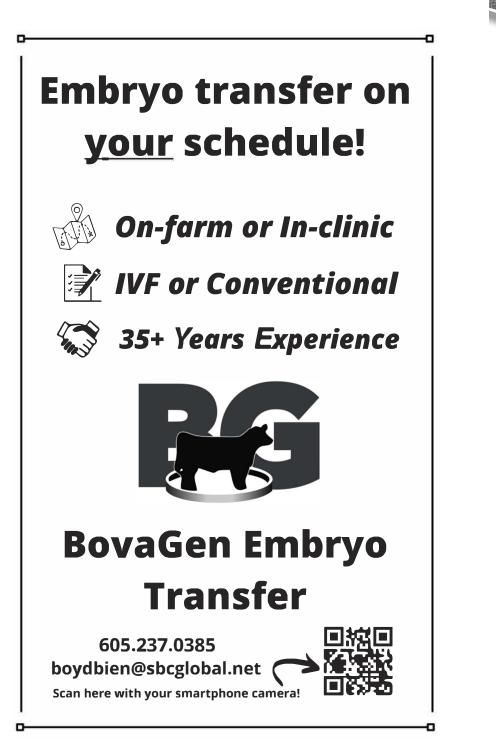

Terry Ellingson and his father Trueman began Ellingson Simmentals in 1990. Through the use of artificial insemination and embryo transfer, the herd has grown to 150 cows of both black and red color. The goal has always been to produce high-performance cattle with calving ease. The use of ultrasound technology has allowed carcass information to be included in data collection of all bulls and heifers. We have been recognized as a performance advocate by the American Simmental Association for our data collection in birth, weaning, yearling and ultrasound information.

Our annual production sale is the fourth Friday in January at the farm near Dahlen. Our 22nd annual Ellingson Simmentals Performance Bull and Female Sale will be held Friday, Jan. 21, 2022.

Visit www.ellingsonsimmentals.com for further information.

GRASSY MEADOW RANCH Final Stop. Oct. 4

We are excited to welcome you to the 2021 All Breeds Cattle Tour and Grassy Meadow Ranch!

My husband and I both grew up with cattle. David was raised on an Angus ranch and I grew up on a dairy farm, where we also had Red Angus commercial cows. David and I bought our first group of registered Red Angus females before we got married. Our ranch is very family-orientated. We have four children that love being involved in

every aspect, from working cows and calving to fieldwork.

Our focus has been to add some more frame and power to the Red Angus breed. We love the maternal power and ability of our Red Angus females. The docility is second to none with our kids being out there with us. Our customers need good females, but also need weight in the fall so we have been taking our maternal powerhouses and breeding carcass and frame powerhouses to get what we feel is a great combination. You have marketable steers while not being afraid to keep replacement heifers.

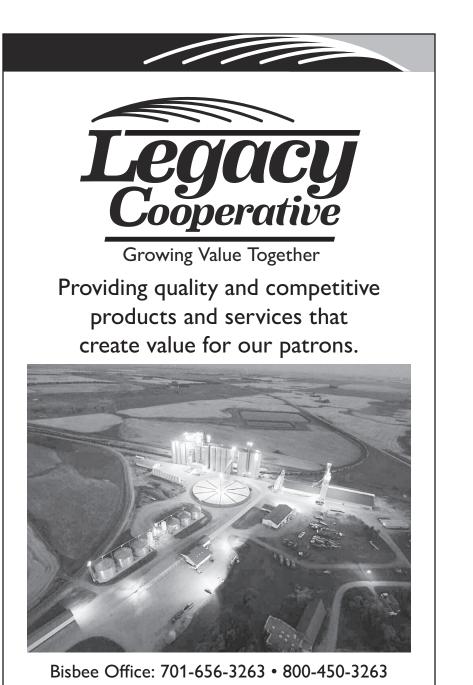

We can't wait for you to view our sire groups that we will have available on our production sale in January. We use artificial insemination and embryo transfer extensively to keep our genetics moving forward quickly. We will have some ET calves along with natural calves out of our donors on display. Our females that will be for sale at the North Dakota Red Select Sale will be available for viewing tour day.

Grassy Meadow Ranch's 6th Annual Production Sale will be held Jan. 8, 2022. The sale is held at the ranch headquarters. We will sell approximately 50 bulls and 12 bred females for March calving.

Visitors are welcome anytime. We enjoy visiting about cattle and keeping up with what the industry and our customers would like for their operations to continue moving forward. Thank you for joining us on the tour!

GRASSY MEADOW RANCH

5954 Hwy 66, Bisbee, ND 58317

www.legacy-cooperative.com

Welcome to the 2021 All Breeds Cattle Tour! We are excited to have you on our ranch. Thank you so much for taking the time to come to our part of North Dakota.

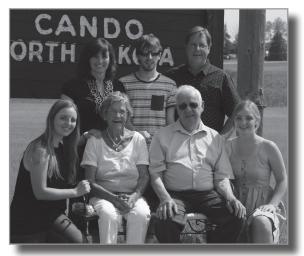

In 1962, our Angus herd was started with the purchase of five Angus heifers from Wesley Moore from Cogswell. We purchased our first bull from Clyde Barks of Snowrest Angus from Egeland. The bull's bloodline was Peace Garden Eileenmere OSY, which became the foundation bloodlines of our Angus herd. Other sire bloodlines that have been used since include Hi Guy, Viking, Patriot, Krugerrand, Objective, Mytty In Focus and more.

At this time, the ranch is run by Wayne, Marguerite, Jason, Tom, Judy, Joseph, Eliza and Cecilia Freund.

Our goal is to continue to raise functional females that calve on their own unassisted and raise a calf that will thrive in the pasture.

We have been selling bulls and heifers since the early 1970s by private treaty. We have transitioned from holding a production sale (which was held for about IO years) and are now selling by private treaty.

We hope that you have enjoyed looking at our cattle and that you had a wonderful time visiting all of the ranches in the area!

Nelson Angus would like to welcome everyone to the 2021 North Dakota Stockmen's Association's All Breeds Cattle Tour.

Nelson Angus was started in 1961 by Otto and Sharon Nelson with the purchase of three cows and a bull from Clyde Bark's Snorest Angus Farm. Additional females and herdsires were then selected from the Henry Kruger herd in Killarney, Manitoba, Canada, and other top-producing herds through various sales, such as the North Dakota Winter Show and North Dakota Angus Association sales. A large percentage of our present-day cowherd still traces back to these foundation genetics at least once. From the early beginning, Nelson Angus has been a family affair, with all five of Otto's and Sharon's children being involved, working on the ranch and competing in 4-H, FFA and junior activities.

In 1997, Otto and Sharon handed over the management and control of the day-to-day operations of the Nelson Angus cowherd to two of their sons, Mike and Dan. Since then, we have been utilizing some of the newest technologies available to the livestock industry, as well as adding some top new genetics to the Nelson herd the through purchase of live animals, semen and embryos from some of the top herds across the country.

Currently, we run about 150 mother cows and approximently 35 replacement heifers a year. We calve from February to April. We use artifical insemination technology for more than 75 percent of the cowherd and all of the replacement heifers before turning them out on grass pasture with our top-notch herdsires.

We primarily market our genetics through two sales each year. In November, we will proudly be part of the 9th annual Pearls of the Prairie Angus Sale at Kist Livestock in Mandan, where we will be offering our top show heifer prospects and a powerful set of bred heifers.

On March 12, 2022, we will be hosting our 19th annual production sale at the ranch 1 $\frac{1}{2}$ miles north of Egeland in our heated sale facility. We will offer a powerful set of approximently 35 bulls, as well as select groups of heifer calves and bred heifers.

We would like to thank you for stopping by our ranch and for attending the tour. We hope that next time you are in the area you stop by. We are always ready to talk cattle.

JOHNSON BROTHERS ANGUS Second Stop. Oct. 5

"We raise quality cattle for cattlemen who sell by the pound."

Our farm has been in our family since 1912, raising small grains and cattle. Vernon Johnson and sons Terry, Todd and Tim raised Herefords until the 1990s, when we started

exclusively breeding to Angus bulls. Since then, Terry's sons, Jeremy and Nathan, and Tim's son Derek have taken over the reins and raise commercial and registered Angus cattle.

We have been selling bulls and replacement heifers for sale by private treaty successfully for years. We also enter and sell a select few bulls in the Midland Bull Test Sale held each April in Columbus, Mont. Since 2007, we have brought in carefully selected registered Angus females and continue to add to our herd through the selection of embryos. We breed for structural soundness and maternal ability and our cows perform on a roughage-based diet. We artificially inseminate our heifers and a large percentage of our cowherd. We choose our bulls to enhance maternal ability and produce quality calves that excel in the feedlot.

We continue to strive for better performance of our cattle with the end result of better tasting and grading beef. Since 2005, we have collected carcass data on all of our market steers by re-

JBAR Boost 406

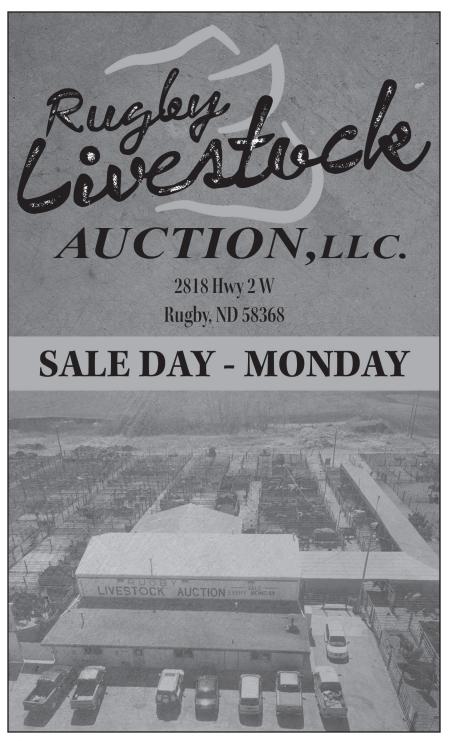

Field Day - 2021

taining ownership to track their performance annually, which leads to an increase in our customers' bottomline. They have been grading Choice and higher, with a high percentage of Certified Angus Beef premiums.

We are proud to offer our genetics to help other producers increase their end results and bottomline.

Visitors are always welcome!

MCCUMBER ANGUS RANCH Third Stop. Oct 5

Welcome to the 2021 NDSA All Breeds Cattle Tour! We thank you for participating in the tour and hope you enjoy your time in northern North Dakota.

McCumber Angus Ranch was established in 1964 as an FFA project for my dad, Chuck. My grandpa Harold and my dad started with the purchase of five half-sisters from a local Angus breeder. From those original heifers, the McCumber cowherd was built. Today, a majority of the cowherd will trace to two of those original females.

They are represented by the Miss Wix and Rosetta cow families, which are now recognized throughout the Angus breed.

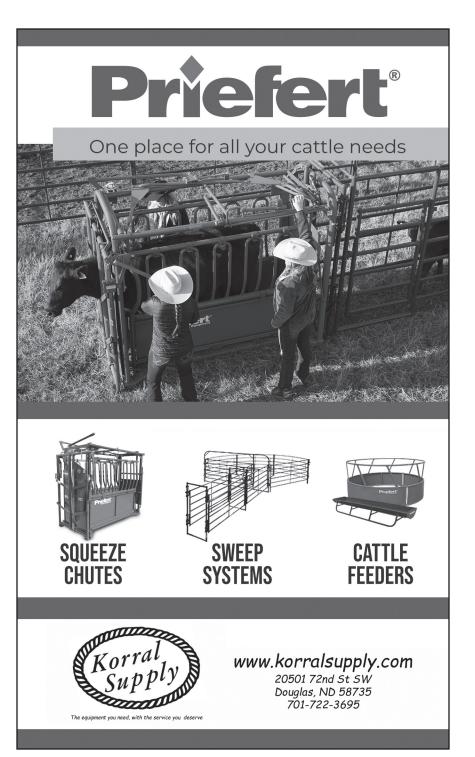

For 57 years, the focus of our breeding program has been to build and maintain a top cowherd that is efficient, fertile, productive and problem-free. We focus on breeding cattle that will work in a forage environment and not only survive, but thrive. We breed cattle with the commercial cow-calf producer in mind. We want a productive, problem-free, easy-fleshing female that is fertile and long-lasting. She must be able to get the job done in any environment. To accomplish this, balance is the key. By selecting cattle with a balance of traits and not single-trait selecting, we are able to supply the commercial producer with seedstock that will help keep them profitable under all economic and environmental situations.

We hold our annual production sale the fourth Wednesday of March here at the ranch and offer the top 2/3 of our bull calfcrop, as well as a large group of embryo transfer full brothers. In addition, we offer a select group of registered heifers and commercial heifers right from our program.

We are a family operation and represent the third and fourth generations on the ranch. We are thankful for the opportunity to do what we love and look forward to the future of the beef industry and the Angus business in the years to come. Thanks again for attending the All Breeds Cattle Tour and know that you are welcome to come by the ranch anytime to look at the cattle or visit.

MCCUMBER ANGUS RANCH Chuck & Gail Tastad Matt & Cynthia Tastad 8675 37th Ave. Rolette, ND 58366 (701) 246-3847 mctastad@utma.com www.mccumberangus.com

GURR LAKE ANGUS

We are honored to be a part of the All Breeds Cattle tour for 2021! We welcome you to our farm.

The Gilje family has been farming here since 1888 and we hope to continue for many years to come. Our first registered Angus cows were purchased from McCumber Angus Ranch in 1999, with additional bred heifers coming from Van Dyke Angus Ranch in 2000 and 2001. Since that

time, our registered herd has gradually grown and replaced our commercial cattle. The focus of our program has always been on producing trouble-free females. We develop bulls with a bit less emphasis on feed and gain than most operations. Grass is the main ingredient in beef and is the most efficient method of harvesting rain and sunshine.

Steve, Joellen, Jimmy and Sonja Gilje took over the daily operations in the summer of 2003. Jimmy and AbbyJo now live in Pelican Rapids, Minn., but they are planning to move to Rolette in 2022 and become more involved again. Sonja is currently a student in the veterinary medicine program at the University of Minnesota.

This summer has placed a real strain on the pastures and feed situation for the coming winter, but farmers and ranchers have always been resilient and we will make the best of what we are given. Life on a farm is not for everyone, but for those of us that enjoy it, there is nothing better.

We have recently begun offering freezer beef directly to customers and we sell U.S. Department of Agriculture inspected Gurr Lake Beef at a few farmers markets. Save the world (and your local ranchers) by eating beef every day!

Thanks to the North Dakota Stockmen's Association and our sponsors for making this event possible! Enjoy the tour!

GURR LAKE ANGUS Steve & Jo Gilje & Family 8876 36th Ave. Rolette, ND 58366 (701) 246-3427 gurrlakeangus.com

KENNER SIMMENTAL RANCH Till Stop. Oct. 5

Welcome to the 2021 All Breeds Cattle Tour and Kenner Simmental Ranch!

Located south of Leeds, Kenner Simmental Ranch has been raising Simmental and SimAngusTM cattle since 1974. The cowherd consists of 450 registered Simmental and SimAngusTM cows that are red and black, with a small herd of purebred Red Angus.

Roger Kenner sold bulls privately from 1976 until 1996 before making the decision to host a production sale. The 2021 sale marked the 25th annual Kenner Simmental Ranch production sale.

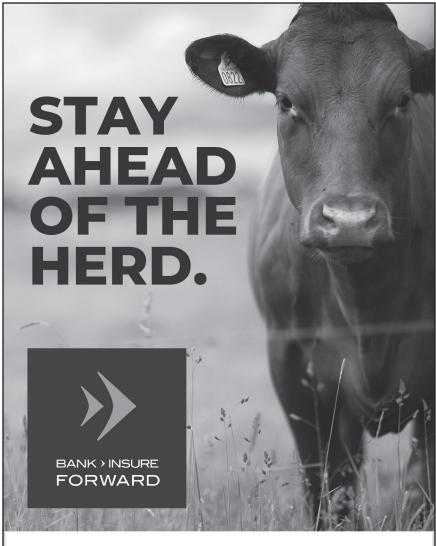

They market approximently 130 bulls in the sale and roughly 70 bred heifers. The sale is held the second Saturday of February at the ranch.

Kenner Simmental Ranch uses extensive artificial insemination, embryo transfer and DNA technology to keep making better genetics. Additionally, a grain farm enterprise accompanies the cattle enterprise. Kenners raise all their own feed.

Roger's daughter Erika works alongside him on the farm and ranch. Their herdsman, Bryan Leapaldt, was hired in 1996 to manage the cowherd and has been with the ranch ever since.

THIS IS A TESTIMONIAL:

We could go on and on about Wind and Rain[®] mineral. How it provides the essential minerals cattle need in a convenient, weather-resistant granular form. But these cows say it all. Rely on this proven solution available through the Purina[®] All Seasons[™] Cattle Nutrition Program.

We can tell you more than this ad ever could. **Or visit ProofPays.com**

Ration Balancing and Feed Supplements To Meet Your Specific Needs RAIRIE NUTRITION CENTER, INC.

Since its founding in 1991, Prairie Nutrition Center Inc. has become a leader in animal health. Headquartered in Hebron, ND, Prairie Nutrition Center Inc. is committed to assisting cattle producers through all phases of beef production by providing the highest quality mineral supplements.

"We continue to research product lines that return an investment and save labor resources." Warren Woroniecki, Owner

From Conception to Consumption...

- Cow Calf & Yearling Program Starting 90 days before calving with Prairie Nutrition Center's line of products, producers can support colostrum quality, calf vigor and placental cleanout.
- Beef Feedlot Program Producers can support the increased metabolism of nutrients, superior immunity and enhanced rumen function of their feedlot herd.
- Forage Max Program With PNC's line of Forage Max Minerals, cattle will spend more time ruminating and less time eating, allowing the producer to utilize their forages, increase average daily gain on calves and yearlings and maintain milk production on the beef cow.
- Woroniecki Ranch All-Around Program Provides a horse with focus no matter what their job is. We do our best to nutritionally prepare mares and, in turn, prepare foals and young horses for a long healthy life that starts with the right feed additives. We incorporate bioavailable organic trace minerals, live probiotics, Selenium yeast and added Vitamin E for all the right tools to ensure your horse's essentials are covered. Offered in a complete pelleted form or a supplement mineral/vitamin lick tub.

PROFIT. REPEAT. Generate repeated profits with the

industry's most-favored female.

Independent research from a decade of data collection showed Red Angus-sired heifers commanded \$66/head more than females of other breed types. That's nearly \$5,300 on a single load of replacement heifers to boost profits on your operation.

Visit www.ndredangus.com for more information on Red Angus in your area.

NORTH DAKOTA REB ANGU

ASSOCIATION

One Shot. Two Ingredients. Fast Recovery.

New Draxxin[®] KP can treat BRD and fever quickly.¹²

Start treating bovine respiratory disease (BRD) and fever quickly with Draxxin* KP (*tulathromycin and ketoprofen Injection*) Injectable Solution. The long-lasting BRD treatment you trust now has added fever control that can help improve animal well-being.¹² **It's an effective combination that can help your cattle recover from BRD and fever fast, to help them feel better.**

IMPORTANT SAFETY INFORMATION: Draxxin KP has a pre-slaughter withdrawal time of 18 days in cattle. Not for use in female dairy cattle 1 year of age or older, including dry dairy cows. Not for use in beef calves less than 2 months of age, dairy calves, and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in animals previously found to be hypersensitive to tulathromycin and ketoprofen. See full Prescribing Information.

Boost your calves' natural defenses

Calves are most vulnerable at weaning, facing many stressors with immune systems that aren't fully developed. The Purina[®] starter line now has RX3[™] Immune Support Technology to prepare your calves' natural defenses and help address stressors and weaned health challenges. The goal? Healthy calves that support your bottom line.

RX3[™] Immune Support Technology is:

- Included in Purina[®] Accuration[®] Starter, Precon[®] Complete Feed and Stress Care[®] Supplement
- Research-proven to support a strong immune system
- A complement to respiratory vaccination programs

Visit with your local Purina representative to learn more about RX3[™] Immune Support Technology. Find more information at **purinamills.com/RX3**.

GAVILON 🕏

Trusted Locally. Connecting Globally.

Combining our local knowledge, market intelligence and global distribution network, we manage agricultural commodities and create value in the complex marketplace.

Our History:

Combining our local presence with our global network of destination markets, Gavilon has built strategic relationships with producers and consumers of grain, food and feed ingredients and fertilizer. With facilities located in major growing areas and on major railroads, rivers and ports, we have the resources and infrastructure to provide competitive values across these agribusiness supply chains.

Behind every transaction is a team of professionals you can count on to manage your commodities and help manage your risk. Using our in-depth knowledge of commodity markets and movement empowers our team to navigate the increasingly complex global supply chain and provide producers and customers with local operational knowledge and global market intelligence.

Our Vision:

To innovate to meet the needs of people within the global agricultural supply chain.

Our Mission:

We are the trusted provider of agricultural products and services to producers and consumers around the world.

FOUR DRIVING DIRECTIONS

Monday, Oct. 4, 2021

MIDWAY POLLED HEREFORDS

From the Fireside Inn in Devils Lake, head south on ND-20 S to St. Michael for 8.5 miles. Take BIA Road 20 and Brown Road to 29th Street NE for 11.5 miles. Go approximately five miles on 76th Avenue NE to 76th Street NE. Head west for one mile to the ranch headquarters.

TOPP ANGUS

From Midway Polled Herefords, travel east for approximately one mile until 76th Avenue NE. Continue on for seven miles until turning left onto ND-15 E. Head another seven miles. Head south onto 83rd Avenue NE for one mile before continuing on 82nd Avenue NE for approximately four miles. Turn left onto 14th Street NE to the ranch headquarters.

SPICKLER RANCH NORTH

Head west on 14th Street NE towards 82nd Avenue NE. Turn left at the first cross street onto 82nd Avenue NE and continue on for nearly seven miles, through Grace City. Turn left onto 7th Street NE for one mile before continuing north on 83rd Avenue for half a mile. Turn right and continue for one mile to the ranch headquarters.

JALLO ANGUS RANCH

Take 85th Avenue NE and 11st Street NE to ND-20 N in McHenry. Turn left onto ND-20 N and continue for 16 miles. Turn right onto ND-15 E and travel for 13 miles before continuing on ND-1 N. Then, turn onto U.S. Highway 2 and head east for 22 miles. At the junction of ND-32 N, head north for approximately 14 miles. Head west on 55th Street NE for 5.5 miles. The ranch headquarters will be on the north side of the road.

ELLINGSON SIMMENTALS

Turn left at the Jallo Angus Ranch mailbox and head east on 55th Street NE for 2.5 miles. Turn right onto County Road 14 and continue for approximately four miles to the ranch headquarters.

GRASSY MEADOW RANCH

Head out of the yard and north to County Rd I. Continue on for nine miles. Turn left onto ND-35 S and head south for nearly seven miles. Ranch headquarters will be on the west side of the road.

TOUR DRIVING DIRECTIONS

FIRESIDE INN

From Grassy Meadow Ranch, head south on ND-35 S to Michigan. Turn right onto U.S. Highway 2 and continue on for 36 miles. The tour headquarters will be on the right side of the road.

Tuesday, Oct. 5, 2021

LAZY W ANGUS RANCH

Head west on U.S. Highway 2 for nearly 20 miles. Turn right into Churchs Ferry and head north on U.S. Highway 281 for approximately 18 miles. Turn left onto 77th Street NE and head to the ranch headquarters.

NELSON ANGUS

Head east to U.S. Highway 281. Continue north for seven miles. Turn right onto ND-66 E and travel for five miles. Turn left onto 72nd Avenue NE and continue for 1.5 miles to the ranch headquarters.

MCCUMBER ANGUS RANCH

Head out of the yard and turn right onto ND 66-W. Continue for twenty-five miles. Turn left to stay on ND-66 W and keep traveling for nearly 12 miles. Then, turn left onto 37th Avenue. The ranch headquarters are located on the west side of the road.

GURR LAKE ANGUS

Head out of the yard and north on 37th Avenue towards ND-66 W. Turn left at the first cross street onto ND-66 W and continue west for one mile. Turn right onto 36th Avenue NE and travel for two miles. The ranch headquarters will be on the right.

KENNER SIMMENTAL RANCH

Head out of the yard and southeast on 36th Avenue NE towards 88th Street NE for two miles. Turn right onto ND-66 W and continue on for 7 miles. Turn left onto ND-3 S and travel for 23 miles. Then, turn left onto U.S. Highway 2 and continue on for 27 miles. Turn onto 55th Avenue NE at Leeds and travel for approximately three miles. Turn left on 57th Street NE and the ranch will be located on the south side of the road.

FIRESIDE INN

From Kenner Simmental Ranch, head east on 57th Street NE before turning left onto 59th Avenue NE and travel for three miles. Turn right onto U.S. Highway 2 and continue on for 27 miles. The tour headquarters will be on the left side of the road.
