# Welcome

Welcome to the 2022 All Breeds Cattle Tour!

This has been another interesting year for cattle producers in our state, as we came off an extreme drought with the much-needed moisture that the record-breaking spring storms brought. Although there was some hardship with the snow and rain, we have had one of the best grazing and haying seasons in recent memory. Now that fall is upon us, it's time again to hold the 35th annual All Breed Cattle Tour and we are excited to showcase what each of our hosts have to offer at their ranches.

The Cooperstown area will be having a one-day tour based out of the AmericInn in Valley City. There will be six stops featuring eight breeders. These top-notch seedstock producers represent a variety of breeds, including Angus, Hereford, Red Angus, Simmental and SimAngus.

We would like to recognize our sponsors, who are great supporters of our operations and our industry. Thank you, sponsors! A big thank-you also goes to all our tour hosts, who worked hard to bring this tremendous tour together.

All the tour hosts look forward to showing everyone their cattle and operations and getting to visit with fellow ranchers and agribusiness professionals on the 35th annual All Breed Cattle Tour.

Sincerely,

*Kelly Hanson*

Tour Chairman

# Olson Hereford Ranch

*First stop, Oct. 3*

Welcome to Olson Hereford Ranch and the 2022 All Breeds Cattle Tour!

We have been in the registered Hereford business since 1936, making us the oldest Hereford breeder in the state!. In 1991, we ventured into Red Angus — striving to produce Red Angus with more performance and growth. Currently, we run 200 females, including 50 Herefords, 140 Red Angus and 10 commercial recipient cows. Additionally, we farm about 3,000 acres, raising corn, beans, wheat, oats and hay. We are located 7 miles west, 1 mile north and 1/2 mile west of Argusville. We are a family operation with Edward and Jeanne Olson working along with Carl, Lindsay, Dru and Stetson Olson.

Our annual Red Power Bull and Female Sale will be February 16, 2023, at the ranch. We will offer the top end of our bulls and 35 heifers. We have been consigning females to the North Dakota Red Select and North Star Classic Sales in the fall. We like to help new breeders get started and always have cattle for sale privately.

Performance is our priority, with an emphasis on udder quality, maternal traits and eye appeal. We use embryo transfer, artificial insemination, carcass ultrasound, pelvic measurements and DNA testing. We use rotational and cell grazing to maximize pasture productivity. We also raise all our own feed.

Our Red Angus herd traces to OHRR Dakota Copper 29K, who was a leader in the ABS lineup; and Red Global Trust 21T, sold with Cattle Visions and Pie Game Plan 0618, who is in top 1 percent of the breed for milk. Our current Red Angus herdsires are TWG Vessel U63D, DCND Direct Brilliance 971, Rreds Seneca E709 and Six Mile Encarnacion 866E.

Our Polled Hereford cows go back to VCR Kodiak 506E, Dakitch MDK Caretaker 51B and NJW Hometown 10Y. Some of our young sires are OHR Heppners Boss G6 and ANL 206E Bottom Line 39W 63H. Our newest sire is CMF 250D Holland 625H who is in the top 1 percent of the breed for weaning weight, yearling weight, maternal milk and growth, carcass weight, ribeye area and the Certified Hereford Beef index.

We are proud to be your breakfast stop on the tour. Please do not hesitate to contact us any time.

# Elliott Livestock

*Second stop, Oct. 3*

Elliott Livestock would like to welcome you to the 2022 NDSA All Breeds Cattle Tour!

Kevin Elliott and his sister Marcia purchased their first Simmental heifers in 1984 as 4-H projects. Since then, Kevin has been expanding and improving the herd.

Kevin enjoys farming and ranching with his family. We strive to produce top-end genetics and focus on functional, productive, high-quality carcass cattle to give our customers as much potential as possible. We utilize DNA and ultrasound to get the most data we can to improve our genetic accuracy. Our entire herd is genotyped with the Cow Herd DNA Roundup, and we continue to utilize calfcrop genomics on all of our calves through the American Simmental Association to get the most accurate EPDs when analyzing our herd.

Elliott Livestock hosts an annual production sale the third Tuesday of November, with Wild Rose Cattle Company, which is owned by Kevin's daughter Mikenzie and her husband Zach. The offering consists of 18-month-old bulls and select bred heifers. The sale bulls are grown on a balanced, high-fiber ration and are not exposed to any cows. The bred heifers are pastured just like the rest of our replacements. We want the cattle we sell to be raised for longevity for our customers.

We enjoy having visitors at all times of the year, so please give us a call to schedule a tour. You are always welcome.

# Tri E Simmentals

*Second stop, Oct. 3*

Mike and Patty Elliott started Tri E Simmentals in the 1980s, when they bought the foundation of their cowherd. With the help of artificial insemination and embryo transfer, the registered cowherd is now up to 150 head. Mike's and Patty's son, Kurt, his wife Cheryl and their three kids, Chase, Dani (Kyle) and Levi (Kael), all take part in the operation. Simmental and SimAngus bulls are offered private treaty beginning in February. We take pride in raising functional cattle that work in many different operations. Along with the registered cattle, we run 150 commercial cattle and a feedlot.

We are thankful for the opportunity to host you on this tour and are excited to meet everyone as a guest at Elliott Livestock. Feel free to contact us at any time and follow us on Facebook for updates at Tri E Simmentals.

# Ressler Angus Ranch

*Third stop, Oct. 3*

Our family's livelihood consists of raising durable and functional registered black Angus cattle in the beautiful Cooperstown area. Ressler Angus Ranch originally set out as commercial ranchers influenced by Ryan's parents and grandparents. Along the way, we found an excitement in improving our functional cow. Eventually, we found our way into the seedstock business and have become passionate about connecting with like-minded cattlemen and women in all aspects of the agriculture industry.

In our minds, a functional cow means she calves easily, breeds back quickly and maintains her condition on a no-frills pasture or ration year after year. This is the foundation of the bulls we raise and the replacement females we offer. We take pride in providing this standard of animal to our customers in an honest and practical way. It matters to us that what our customers purchase works for their operation. Whether it is a universal bull for their moderate-size herd, a heifer bull for their development program, a bull that produces pounds or a female that turns into the foundation of your herd, we take pride in the success our customers achieve.

We are delighted to now offer frozen semen on more than six different stud-quality bulls, a wide assortment of embryos, a large selection of quality replacement females and a consistent offering of herd bulls every year.

Thank you for your interest in the 2022 All Breeds Cattle Tour and our operation. We look forward to working with you.

# Ressler Land & Cattle

*Fourth stop, Oct. 3*

Welcome to the 2022 NDSA All Breeds Cattle Tour. We thank you for participating in the tour and hope you enjoy your time in east-central North Dakota.

Ressler Land and Cattle is a partnership between Bryan and Mark Ressler that began in 2013. We raise registered Red Angus cows and bulls, as well as commercial cattle. Mark and his wife Sarah have three children, Kate (6), Meredith (3) and Hannah (1). Bryan and his wife Lauren have one child, Isaiah (6). Mark and Bryan farm and ranch alongside their parents, Larry and Karen.

Mark's and Bryan's farming careers started as brothers helping on their dad's farm. Larry's commercial cowherd began in the late 1970s. He has utilized artificial insemination to produce high-quality females to retain in his herd. This provided the foundation for the commercial cowherd. Bryan and Mark began their individual herds as 4-H projects that came from their dad's commercial cowherd. In 2016, Ressler Land and Cattle purchased a herd of registered Red Angus cows.

Ressler Land and Cattle hosts an annual bull sale the second Sunday in January. We sell coming 2-year-old bulls and commercial bred heifers. We select the bulls for our sale based on their growth data and docility. The contemporaries that are not chosen for bulls are finished at the farm. The carcass data collected has proven the quality of their genetics and the ability of our herdsires to produce a profitable feeder steer. The selected bulls can breed well, have large frames and have developed good feet and legs before being sold to cow-calf operations. We take great pride in ensuring our animals will be ready and able to do the job needed of them when they arrive at your facilities. Many of the females sold at our sale are buybacks from customers who purchased Ressler Land and Cattle bulls.

Thank you again for joining the NDSA All Breeds Cattle Tour. Please feel free to contact us at any time or visit our farm.

## TUESDAY IS SALE DAY

# Twedt Red Angus

*Fifth stop, Oct. 3*

Welcome to the 2022 NDSA All Breeds Cattle Tour and Twedt Red Angus!

Twedt Red Angus is a family-owned operation located north of McHenry. It is owned and operated by Sam Twedt, his wife Emily and their children, Nora, Brynn, Wyatt and Eden.

In 2009, we purchased the entire cowherd of Bar R Red Angus. Twedt Red Angus now consists of more than 150 registered cows. We also have an aggressive embryo transfer program, where we implant around 100 embryos a year. It is our goal to offer our customers the best genetics available, and we feel our embryo transfer program gives us the best opportunity to do so. We also cull extensively—no excuses. We offer problem-free genetics that still provide performance.

We hold our annual production sale the first Tuesday in February. The offering includes 70 yearling and 2-year-old bulls, 20 registered bred heifers and an elite group of commercial Red-Angus-cross heifers.

Thank you for taking time out of your busy schedules to attend the tour. We invite you to stop out any time. We would love to show you around.

# Haugen Cattle Company

*Sixth stop, Oct. 3*

Welcome to the NDSA 2022 All Breeds Cattle Tour and Haugen Cattle Company!

Haugen Cattle Company is a partnership between Eldo, Troy and Lynn Haugen and their wives, Connie, Jill and Dawn. Lynn and Dawn have two boys—Tanner, who is a sophomore at North Dakota State University, and Brady, who is a sophomore at Griggs County Central High School. The ranch's homebase is located 5 miles east of Hannaford. The partnership also owns and operates Haugen Farms, with the help of Tanner, Brady and dedicated hired men.

We are a purebred Angus cattle operation that consists of a more-than-320-head cowherd. We hold an annual bull sale the fourth Friday in March at Kist Livestock Auction in Mandan. We sell open and bred heifers private treaty and take a select group of each to the Angus Partners Sale in January, also held at Kist Livestock Auction. In addition, Haugen Cattle Company also consigns bulls to the North Dakota Angus State Select Bull and Heifer Sale and North Dakota Bull Test.

Haugen Cattle Company uses an extensive artificial insemination, embryo transfer and DNA testing program, which allows them to improve their genetics each year. We strive to produce high-quality cattle for purebred and commercial cattle producers. In 2017, we were honored to be named the North Dakota Angus Association Breeder of the Year.

We are thankful for the opportunity to host you on the 2022 NDSA All Breeds Cattle Tour. As always, feel free to stop by the ranch or contact us any time.

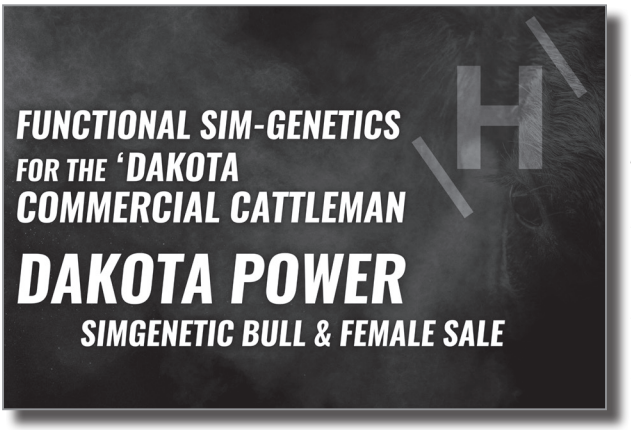
# Triple H Simmentals

*Sixth stop, Oct. 3*



Triple H Simmentals would like to welcome everyone to the NDSA's 2022 All Breed Cattle Tour.

Triple H Simmentals is a family-run operation along the Bald Hill Creek and the Sheyenne River Valley in east-central North Dakota, located one mile east of Hannaford. We raise performance-driven Simmental and SimAngus cattle that are sound in structure and udder quality, with attention to docility. Kelly, Bryan, Justin and Brayden Hanson, with the help of many family members, run Triple H Simmentals. Our dad Jerry began using Simmental genetics on our Angus, black baldie and Hereford-cross cows in the early 1980s. The first registered Simmental females were purchased in 1987 at the North Dakota Simmental Classic Sale as 4-H projects, and they became the foundation of our breeding program.

Today, our cowherd consists of 200 Simmental and SimAngus. We have been using an extensive artificial insemination and embryo transfer program for the past 34 years to utilize the top genetics in the industry. This allows us to improve genetics, as does the purchase of high-quality bulls that complement our program. We utilize the American Simmental Associations genomic programs to advance our genetics that will benefit commercial cattle poducers' bottomline.

Triple H Simmentals 19th Annual Dakota Power Bull and Female Sale will be held at the ranch east of Hannaford on the second Monday in February. We will offer approximately 60 bulls and 40 bred females. We also consign females to the North Dakota Simmental Classic Sale in Mandan and will have them on display on this tour.

Visitors are always welcome to stop by for a tour of our operation and talk cattle. Thanks to the NDSA for the opportunity to be a part of the 2022 All Breed Cattle Tour.

Draxxin® KP
(tulathromycin and ketoprofen Injection)
INJECTABLE SOLUTION

# One Shot.
# Two Ingredients.
# Fast Recovery.

## New Draxxin® KP can treat BRD and fever quickly.[1,2]

Start treating bovine respiratory disease (BRD) and fever quickly with Draxxin® KP (*tulathromycin and ketoprofen Injection*) Injectable Solution. The long-lasting BRD treatment you trust now has added fever control that can help improve animal well-being.[1,2] **It's an effective combination that can help your cattle recover from BRD and fever fast, to help them feel better.**

**IMPORTANT SAFETY INFORMATION:** Draxxin KP has a pre-slaughter withdrawal time of 18 days in cattle. Not for use in female dairy cattle 1 year of age or older, including dry dairy cows. Not for use in beef calves less than 2 months of age, dairy calves, and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in animals previously found to be hypersensitive to tulathromycin and ketoprofen. See full Prescribing Information.

# BALANCE THE SCALES

| BREED EFFECTS FOR COW MATURE WEIGHT (MWT)[abc] | |
|---|---|
| Angus | 0 |
| Charolais | -20 lb. |
| Hereford | -39 lb. |
| **Simmental** | **-74 lb.** |

[a]USMARC, Zimmerman, M., et al., "Breed and heterotic effects for mature weight in beef cattle," *J. of Anim. Sci.*, Vol. 99, 2021. [b]Adjusted for sire sampling, Angus was the heaviest at maturity among the 16 breeds evaluated. Solutions are deviations from Angus. YW EPDs were extracted from genetic evaluations conducted in 2019. [c]Estimate of MWT differences at 6 years of age. [d]The study considered 108,857 weight records from 5,156 crossbred cows sired by 787 bulls.

Big cows come with big feed bills.

That's why smart genetic selection pays off in the cow herd. Simmental-influenced cows are an average **74 lb. lighter** at maturity than Angus-sired counterparts, according to a recent U.S. Meat Animal Research Center study.[a,d]

While Simmental is sized for more efficient gains, 20-year genetic trend lines also show the breed offers reliable calving ease, early growth and cow longevity.

That's a balanced herd built for profit.

# STICK TOGETHER.

We need to stick together and provide a strong, unified voice for our industry. For more than nine decades, the North Dakota Stockmen's Association has provided that voice for our state's cattle ranchers. The organization's strength comes from grassroots members like you, and the more members we have, the more effective we are. We need to stick together, and we invite you to join the NDSA.
