Welcome!

This year's tour hosts welcome you to the 2026 North Dakota Stockmen's All Breeds Cattle Tour. We are celebrating the 39th tour and have a fantastic line up of 11 ranches that are showcasing top of the line cattle. The tour, which is an annual event and rotates around the great state of North Dakota, is a favorite of cattlemen and cattlewomen.

Whether you are a lifelong seedstock producer, a commercial cattleman, an industry partner, or a curious newcomer, we are thrilled to have you join us for this year's journey. The cattle industry is built on a foundation of dedication, grit and continuous improvement. Over the next 2 days this year's tour will take us across the beautiful pastures of south central and south western North Dakota, highlighting exceptional operations representing a variety of breeds including Black Angus, Red Angus and Simmental. At each stop, you will have the unique opportunity to look firsthand at high-quality genetics, discuss herd management strategies and network directly with the producers on the tour.

We are able to host this tour thanks to the help of many generous sponsors, who are featured in this tour program. Their support makes this educational and community driven event possible.

Thank you for taking the time to join us and spending 2 days together traveling, evaluating and discussing cattle. We hope you leave this tour inspired, informed and proud to be a part of the cattle industry. Grab your boots, your hat and enjoy your visit.

Sincerely,

Jonathan Marohl & Scott Katus

YellowTop Angus

FIRST STOP, OCT. 6

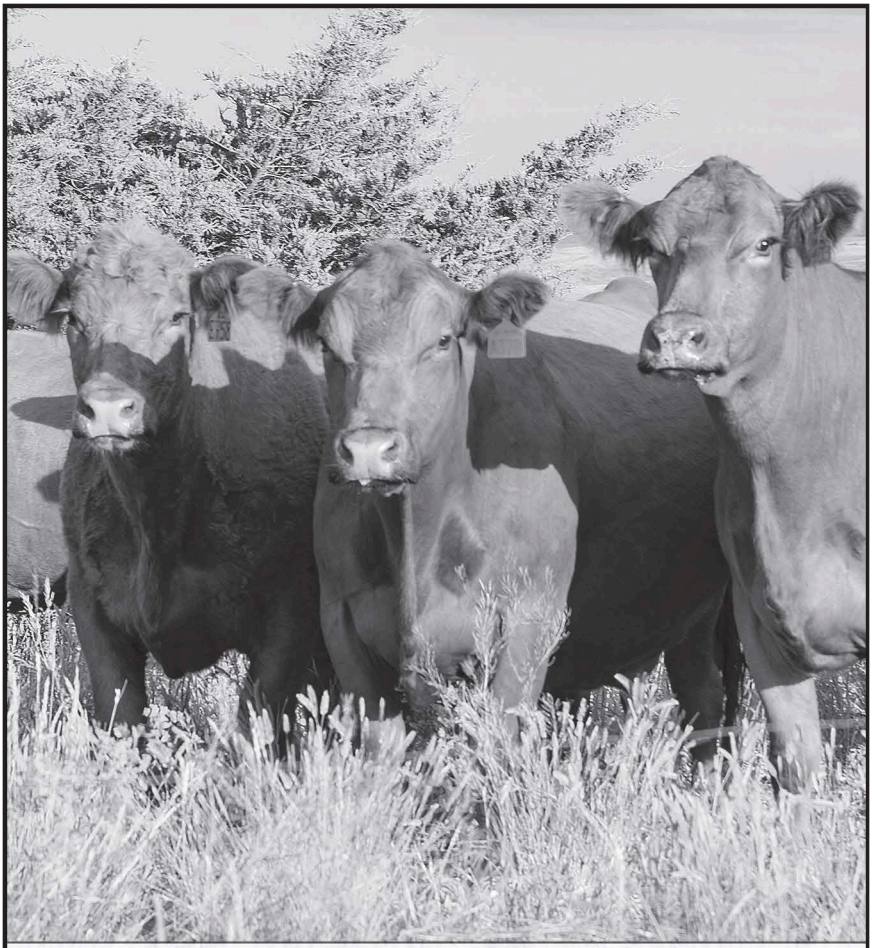

Welcome to the first stop on the All Breeds Cattle Tour at YellowTop Angus. Jonathan and Michelle Marohl and family are proud to be the face behind YellowTop Angus. Jonathan's registered operation started in 1994 with the purchase of one registered heifer. YellowTop Angus started 26 years ago when we had a dream of raising cattle and selling bulls with the highest level of integrity along with raising a family. We are a first generation ranch with the second and third generations coming up. We are proud to be building from the ground up.

We raise coming 2-year-old bulls that are born in May/June and are marketed through our sale at the ranch the Saturday before Thanksgiving. At YellowTop Angus, we feel the best way to develop herd bulls is slowly and with low stress. At weaning time bulls are fed pellets and grass alfalfa hay through the winter. Summertime they are out on grass and then come back to the ranch in the fall to get ready for the sale. We strive to raise good bulls with longevity, that are well balanced, functional, have good dispositions and are ready to cover some country without falling apart. Some of the sires that make up our cowherd include Badger, Honcho, Magnum, Roughrider, Lawdog, Isadore and Schearbrook Shoshone. This November's sale on the 21st, will consist of around 40 bulls. We look forward every year to our sale to see customers that we get to call friends and to meet new customers that have taken interest in our program.

Thank you for attending the 2026 All Breeds Cattle Tour. May God bless you and your families. We look forward to seeing you and getting to visit with everyone.

Schaff Angus Valley

SECOND STOP, OCT. 6

Schaff Angus Valley (SAV) was homesteaded in 1902 and carries forward a sixth-generation family ranching operation with a world-wide reputation for providing superior Angus seedstock, hosting 123 production sales of registered Angus cattle to date. The SAV program is a proven and reliable source of maternally-driven performance cattle built on nearly a century of continuous selection pressure and uncompromising breeding commitment with specific emphasis on traits that affect the productivity and profitability of the commercial cattle sector which is the lifeblood of their business.

Schaff Angus Valley was inducted into the American Heritage Foundation by the American Angus Association for their contributions to the improvement and advancement of the Angus breed. Recognized as the Angus breed's most influential genetic contributor, multitudes of SAV prefix sires continue to be utilized around the globe and include the foundational sires: Traveler 004, Final Answer, Net Worth, Density, Bismarck, Harvestor, International, Resource, Renown, Rito 9969, Pioneer, President, Rainfall, Raindance, Renovation, Territory, Regard, Quarterback, Downpour, Bloodline, America and many more.

Schaff Angus Valley will host its 124th production sale at their ranch on Jan. 30, 2027 with a volume selection of high-quality registered Angus bulls and females. SAV welcomes your visit and looks forward to meeting you!

Ellingson Angus

~~THIRD STOP, OCT. 6~~

Welcome to the All Breeds Tour!

Ellingson Angus is a fourth-, fifth- and now sixth-generation registered Angus ranch built on a cowherd that has stood the test of time. The Ellingson family consists of Chad and Julie Ellingson; Stetson, Brynn and Benson Ellingson; Jameson Ellingson and his fiancée Jalynn Nygaard; Sierra, Keenan, Elias and Rowan Pierce; Medora Ellingson; and Sheridan Ellingson.

We focus on producing Angus cattle that will make positive contributions to the bottomlines of our commercial customers. We have learned that the best way to measure the impact that Ellingson genetics have is to work closely with our customers.

We pride ourselves on offering superior customer service – from providing marketing avenues to helping identify which cattle are best suited for each operation. We utilize vast trait data collection through the American Angus Association's Angus Herd Improvement Record (AHIR) and MaternalPlus programs, genomics and visual appraisal to identify and propagate superior genetics, though our best decisions are still made from seeing firsthand what genetics are making the largest contribution within the fences of our commercial customers. We are fortunate to call some of the region's most progressive producers our customers and friends.

Numerous Ellingson-prefix sires are owned and marketed by every major A.I. stud and are being utilized by many of the most cutting-edge seedstock suppliers around the world.

We host our annual production sale the first Saturday in February. We market 375 registered Angus bulls, 50 elite registered Angus bred heifers and 1,000 top-quality commercial females from our customers. Next year, the sale will be at noon CT on Saturday, Feb. 6, 2027.

We welcome you to our ranch any time your travels bring you to St. Anthony, N.D. We are located 25 miles south of Mandan, N.D.

Keller's Broken Heart Ranch

~~FOURTH STOP, OCT. 6~~

Keller's Broken Heart Ranch was established as a registered Simmental seedstock operation in 1982 by Dwight and Eugene Keller. The first registered calves were sired by purebred Simmental bulls and out of Hereford and Angus cows that made up the base herd. The ranch is situated in the scenic Huff Hills overlooking the Missouri River.

The ranch is operated by brothers Luke Keller (wife: Katy; children: Iva and Rhett) and Jake Keller (wife: Mackenzie), with help from their parents, Dwight and Susan Keller. Their sister, Tessa (husband: Thomas; children: Tate and Teagan), is the county extension agent for neighboring Grant County. Keller's Broken Heart Ranch consists of 400 cows and will celebrate its 30th production sale on November 13, offering 50 twenty-month-old bulls and 100 bred heifers.

The ranch's philosophy of utilizing technology and tools to best identify and offer genetics that excel in economically relevant traits, improving their customers' profitability on payday and their overall bottom line, has earned Keller's Broken Heart Ranch an international reputation for superior Simmental genetics. The KBHR prefix precedes more bulls in the top 50 sires for registrations than any other, including the No. 1 Simmental bull for registrations, KBHR Bold Ruler H152.

Through the use of various technologies, including artificial insemination, embryo transfer, DNA testing, EPDs and economic selection indexes, KBHR has accelerated the genetic improvement of its herd. The utilization of the American Simmental Association's All-Purpose Index (API), along with a commonsense approach to balancing physical quality in the cattle, has helped the ranch advance genetics that truly encompass the vast array of economically relevant traits—cattle that are small and unassisted at birth, grow vigorously to weaning, perform efficiently in the feedlot, generate high-quality, heavy carcasses and breed back quickly with tremendous longevity.

The ranch has retained ownership of its steer and cull heifer progeny for 15 years and has found some of the highest-marbling genetics in the Simmental breed. The herd consists of purebreds and percentage SimAngus, with approximately 30% red and 70% black.

Keller's Broken Heart Ranch is a family operation. We have a true appreciation for our customers and the families that buy bulls and heifers from us. We understand that our genetics need to work in the real world under a wide array of environments. We are thankful for the great friendships and relationships we've made over the years in the cattle business. Visitors are welcome anytime.

Tokach Angus Ranch

~~FIFTH STOP, OCT. 6~~

Welcome to Tokach Angus Ranch and the All-Breeds Cattle Tour!

Tokach Angus Ranch is a multi-generational Angus seedstock operation located four miles east of St. Anthony, N.D. The ranch is operated by Richard and Kathy Tokach, Ben and Natalie Tokach, with their three boys—Bentley, Briar and Gentry.

Our headquarters was homesteaded in 1898 by Stephan Tokach. Registered Angus cattle became part of the ranch in 1955 when Richard M. Tokach purchased the first registered Angus females. More than 70 years later, the majority of our cowherd can still trace back to those early purchases.

Through the years, our philosophy has been to use all the tools available to make sound genetic and management decisions. Tokach Angus Ranch was an early adopter of Angus Herd Improvement Records, artificial insemination, embryo transfer and ultrasound technology for carcass evaluation. Since 2014, our entire calf crop has been DNA tested for increased accuracy in our selection process and for the benefit of our customers.

After many years of selling seedstock private treaty, we hosted our first production sale in 1975. Our 52nd Annual Performance Sale will be held February 15, 2027, at Kist Livestock Auction in Mandan, featuring 120 yearling Angus bulls, 30 registered bred heifers and 30 commercial Angus bred heifers.

Our calves are raised on mother's milk and grass until weaned in late September and are slowly introduced to a total mixed ration. The cows will remain in their pasture until November 1st and then are moved closer to home to go onto winter pastures and graze crop residues. We start calving February 10th and the cycle begins again.

Our 2026 calf crop is sired by Boyd Bedrock, Basin Jameson, Stellpflug Hoffman Rise Above, Connealy Craftsman, Deep Creek Square Deal, Cherry Creek Blue Collar as well as our own powerful set of home raised Herd Sires.

We were honored to receive the 2015 Certified Angus Beef Seedstock Commitment to Excellence Award, recognition that reinforced our commitment to producing genetics that can contribute value from the cow-calf producer through the feedlot and ultimately to the consumer.

Thank you for attending the 2026 tour and don't hesitate to contact us anytime.

6 Mile Angus

FIRST STOP, OCT. 7

Nevada, Krisann, Miles, and Brenda Miller welcome you to 6 Mile Angus and our stop on the 2026 All Breeds Cattle Tour.

We are proud to be a third- and fourth-generation cattle-producing family with a long history of putting an emphasis on data, performance and continual genetic improvement.

The Miller family began primarily as a dairy operation, with a small number of beef cows, until 2000. Through diligent DHIA record keeping, we closely monitored production and herd performance. For 28 years, no herd bulls were used for breeding, with the entire dairy herd bred through artificial insemination. In 2000, Miller Dairy was acquired by a larger dairy, and we transitioned our focus to beef cattle.

In 2007, Nevada purchased 10 registered cows from a dispersion and later acquired an additional 11 head from Gardiner Angus of Ashland, Kansas. In 2009, we began genomic testing the entire herd and started competing at the Midland Bull Test. In 2018, 6 Mile Angus was honored with the Champion High ADG bull in the Low-Birth-Weight Division, Group 2.

Since 2019, we have hosted our own annual production bull sale each February. Our goal is to offer a consistent, functional set of bulls backed by generations of data-driven selection and proven genetics.

For the past six years, we have retained ownership of the steers and heifers we sell, allowing us to collect valuable carcass data and real-world feedlot performance information. In 2022, we won the Dakota Feeder Calf Show. Since then, we have shipped all of our cattle to Nebraska to be finished. Last year's pen of steers graded 96% Certified Angus Beef® with 60% grading Prime and only 3% grading Choice.

Throughout the years, we have utilized artificial insemination and embryo transfer, incorporating genetics from some of the leading bulls in the industry to accomplish our breeding goals. We have seen the value of these technologies firsthand on the dairy side, and we continue to use them to push our beef cattle program forward.

We believe in combining proven genetics, technology, data and real-world results to continually improve the cattle we produce.

Thank you for visiting 6 Mile Angus and for attending the 2026 All Breeds Cattle Tour. We appreciate your interest in our program and are proud to share our cattle and our story with you.

Campbell Red Angus

~~SECOND STOP, OCT. 7~~

Producing cattle that perform for the cattleman has been Campbell Red Angus's goal from the beginning. When Harold Campbell, a founding member, was working for John Morrell in the late 1960s, he saw a set of Red Angus steers hanging in the locker and was very impressed. In 1970, Harold and his brother Harvey moved to our current location. They started a commercial herd that contained Red Angus. They were extremely impressed with the vigor, productivity and overall performance of the Red Angus cattle.

In 1973, they purchased the first Campbell Red Angus registered Red Angus females. In 1974-1975, we sold our first bulls, and we have been selling bulls every year since. Throughout the years of developing our herd, we have maintained fertility, hardiness, efficiency, adaptability and soundness, no excuses.

Our cattle are raised in a ranch environment to require minimal care for the most profit. In 1990, we started our heifer development program. We have consistently produced and sold bred commercial females ever since. We are multi-generational program committed to producing top quality Red Angus bulls and females.

Thank you for attending the 2026 All Breeds Tour and looking at our operation. We invite you to return for our annual production sale on the first Monday in March. Our 52nd sale will be held March 1, 2027.

Maher Angus Ranch

~~THIRD STOP, OCT. 7~~

Fellow Ranchers,

Welcome to the NDSA All Breeds Cattle Tour and Maher Angus Ranch!

Maher Angus is a family- owned & operated ranch by Casey and Gina Maher, along with our children Shayna and Ethan, Sterling, Sonni and Sidney.

Our ranching roots date back to 1917, when the original homestead was settled. In 1970, Dan (Casey's father) purchased the first registered Angus cattle, beginning a legacy that continues today. We are proud to celebrate our 50th Annual Registered Production Sale, held each year on the first Friday of February at the ranch.

At Maher Angus the cowherd is carefully selected for fertility, structural soundness, disposition, udder quality, longevity and overall performance. Through the use of proven A.I. sires and embryo transfer, we continue to strengthen our breeding program and produce cattle that excel in both the pasture and the feedlot.

Our herd has remained a closed herd for nearly 5 decades. Our goal is to produce functional, efficient, high-performing cattle with structural integrity, maternal strength and long-lasting productivity.

We invite you to join us for our 50th Annual Production Sale on Friday, February 5th, 2027. The sale will feature approximately:

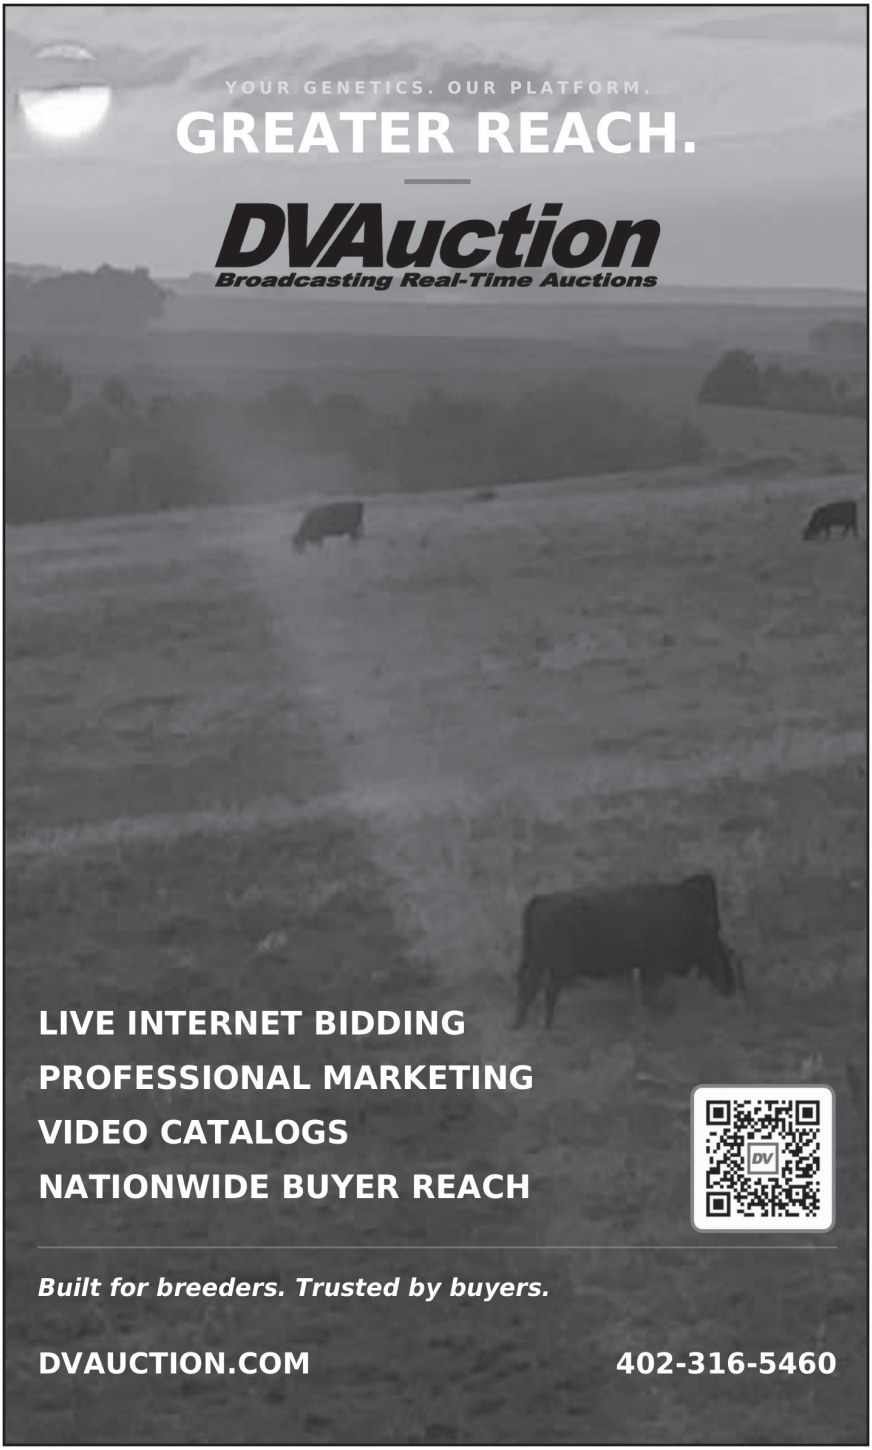

- 150 registered yearling bulls
- 20 virgin 2-year-old bulls
- 125 yearling heifers

At Maher Angus, customer service extends well beyond sale day. From wintering your purchases to delivery and our first breading season guarantee, we are committed to standing behind the cattle we produce.

Thank you for visiting Maher Angus Ranch as part of the NDSA tour. We appreciate your interest and invite you to stop by or contact us anytime.

Katus Ranch Angus Seedstock

~~FOURTH STOP, OCT.~~ 7

Welcome to Katus Ranch Angus Seedstock! It is our great pleasure to host you and give you some insight into our operation.

Our ranch was established in 1903 when JC Spicer brought his family across the Missouri River and formed the X7 ranch on the banks of the Cedar River. Four generations later brings us to present day and we are proud to say we are the oldest single family-owned ranch in this area. Our ranch is operated by myself, Scott and my wife Heather Katus along with sons Cole and wife Brooke, daughters Jaylee, Kezlee and their newest addition, a son, Rocker John, and Braydon Katus marking the 4th, 5th, 6th generations. Our daughters Jaci and Tally help when needed and available from their busy lives.

In 1988, Scott purchased his first three registered females from SAV and slowly built a quality herd for his own use. The registered herd was expanded when Cole and Braydon joined the operation after college and private treaty bull sales started in the mid 2000's. A.I. and an expanded embryo program built off proven donor cows and high-quality breed leading sires fast tracked the herd into an annual bull sale the first Sunday in March at Lemmon Livestock, Lemmon, S.D.

Our ranch was built on the commercial cow and to date we run a leading commercial Angus cow herd along with our registered herd. Our crew also built a nationally recognized commercial bred heifer development program selling F1 baldy and Angus bred heifers into multiple states. With that our registered herd is run just as our commercial cows are with no extra pampering. Big pastures in the summer and lots of fall grazing long into early winter. This makes for bulls that go out and work for a living holding condition and ready for the next breeding season. Our bulls are fed a balanced ration to express their genetic potential without sacrificing foot quality. All bulls and heifers are DNA tested to improve EPD accuracy and insure parentage.

We thank you for attending and welcome any questions about our program.

Brenner Angus

~~FIFTH STOP, OCT. 7~~

Brenner Angus would like to welcome everyone on the 2026 All Breeds Cattle Tour!

Brenner Angus is a 3rd, 4th, and 5th generation family operation located approximately 30 miles south of Carson along the Cedar River. Today, the operation is a family effort involving Sid and Melva Brenner, Jeff and Priscilla Werner and their son Laredo, Trampis and Aricka Brenner and their children, Woodrow, Lori, and Gus.

Sid and Melva started their registered Angus herd in 1973 and later incorporated Red Angus into the operation in 1993. Today, the family continues to build on that foundation. Our emphasis is to raise maternally oriented cattle that look the part, with balanced traits, low-input requirements, high fertility, productivity and performance that can go to work under real-world conditions. We have utilized artificial insemination for decades, along with purchasing top bulls to enhance our herd. Our cow herd begins calving in mid-March, with the majority of our cows calving out on pasture, snowstorm permitting. Calving in a pasture setting puts a strong emphasis on maternal ability. We place a high value on cows that are attentive to their calves, get up and go to work, have plenty of milk and can raise a good calf without requiring a lot of assistance.

Along with our registered cow herd, we run around a 400-head commercial herd, where we utilize predominantly high-birthweight, younger-aged, home-raised bulls. This gives us the opportunity to see firsthand how the genetics we produce work year after year under commercial conditions.

Our annual bull sale is held the last Friday of February at Kist Livestock in Mandan, where we market around 50 Angus and 25 Red Angus bulls. We look forward to welcoming everyone and showcasing our operation during the 2026 All Breeds Cattle Tour!

Gumbo Hill Ranch

~~SIXTH STOP, OCT. 7~~

Gumbo Hill Ranch is family-owned and operated by Blaine and Cassie Mollman, along with their children Brady, Bailie, Tripp and Timry. We're a busy family who spends our days raising kids and cattle on the beautiful prairie hills of southwestern North Dakota.

Breeding and raising Angus and SimAngus cattle for more than 25 years, our focus is to produce maternal, Angus-based females and bulls that can perform with minimal inputs and provide quality genetics that benefit a commercial producer's operation. We believe the cow is the most important part of every pedigree and by selecting the genetics that rise to the top of our program we can identify traits and pedigrees that work and pass it on to our customers through proof of performance and functional longevity.

We set a goal to raise cattle that thrive in our region, while requiring fewer inputs and less problems, creating more profit through genetics, heterosis, and efficiency. Our production model is built around a herd that operates on a similar management style as our commercial customers. Calving in March and April on pasture as weather allows, weaning in October and November. Our cattle graze on large native prairie pastures in the summer and throughout the fall and winter they are required to be hardy with good foot quality, fleshing ability and be to be efficient high-performance cattle.

Holding an annual production sale every February at our sale facility on the ranch we sell 80+ yearling and age advantaged bulls. In addition, we background and breed a large group of home raised females selling some select groups each fall and at the production sale. Customer service is also an important part of our program. Our customers' success is just as important to us as it is to them. We value our customer relationships and friendships forged by getting to know them and their operation. We look forward to sharing our cattle, our family and our operation with you on the North Dakota Stockmen's All Breeds Cattle Tour.

TOUGH ON TOUGH WORMS.
EASY ON CATTLE PRODUCERS.

INTRODUCING VALCOR™ (doramectin and levamisole injection)

Now you can achieve effective parasite control in one product, where before you may have needed two. Valcor (*doramectin and levamisole injection*) is the first prescription cattle dewormer with two active ingredients in one dose. It's never been easier to be tough. Get tough at ValcorTough.com.

IMPORTANT SAFETY INFORMATION: Do not treat cattle with Valcor within 15 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows; not for use in beef calves less than 2 months of age, dairy calves, and veal calves. Safety has not been evaluated in breeding bulls. Use with caution in cattle treated with cholinesterase inhibitors. This product is likely to cause injection site swelling; tissue damage (including granulomas and necrosis) may occur. These reactions have resolved without treatment.

WYOMING-ROASTED

OFFICIAL COFFEE OF CHEYENNE FRONTIER DAYS

STRONGER413 COFFEE

Philippians 4:13 —"I can do all this through Him who gives me strength."

The buyer's gift that stays in their kitchen all year.

Custom-labeled, ranch-branded coffee for cattlemen's sale-day thank-yous and customer appreciation.

Every buyer drinks it—and your brand rides along every morning.

WHY COFFEE WORKS AS A BUYER GIFT

Caps and koozies end up in a drawer. Coffee gets used daily. Put your ranch name, logo, and sale date on a Stronger413 bag and your best buyers see your brand every morning between now and next season—a thank-you that actually earns repeat business.

WHAT WE OFFER

>Custom labels with your ranch name, logo & sale date
>Small-batch beans from Central America, roasted in the USA
>Order for pickup at your sale or shipped your buyers
>Volume-friendly for production sales of any size
>Matching merch: mugs, tumblers, custom hats

BUILT FOR THE CATTLE BREEDER

Western, faith-forward, and family-run—Stronger413 speaks the same languages as your buyers. We're the official coffee of Cheyenne Frontier Days, and we know sale day matters. Give a gift with a story behind it, from folks who live the same way of life.

Let's put your brand on the bag.
Custom coffee for your sale-day thank-yous.

NORTH DAKOTA STOCKMEN'S FOUNDATION

Providing Hope. Creating Opportunity.

Growing Generations.

Since 2008, the North Dakota Stockmen's Foundation has been providing hope and opportunity for the state's beef cattle industry for this generation and the next. Its achievements are thanks to incredible supporters like you!

Over the past year, the Foundation has:

- Provided 12 educational scholarships and increased the scholarship values to better offset the rising cost of tuition.
- Supported youth leadership development programs, this and the NDSA Feedlot Tour and educational programming for cattle producers.
- Sponsored farm safety training for students and Farm Rescue operations for those in need.
- Hosted the Cowboys for Kids event, delivering toys, beef-related information and hope to hospitalized children at Christmas.
- Erected a permanent tribute to industry supporters and a historical display celebrating the North Dakota CattleWomen's first 75 years.

North Dakota Stockmen's FOUNDATION

Proud All Breeds Tour Sponsor

- Private Horse Owner's Liability Coverage

Farm & Ranch:

We insure all sizes of farm & ranch operations throughout the Midwest. We have access to every major carrier in the United States, don't hesitate to call an agent for a FREE-NO OBLIGATION quote today!

Crop / LRP & PRF Division:

- LRP offers protection against unexpected future declines in the market value of cattle & swine.
- PRF covers pasture, rangeland, or forage for perennial haying &/or grazing purposes. It's designed to help protect a producer's operation from the risks of forage loss due to the lack of precipitation.

Trusted Choice

Call an agent today to attend your annual production sale or to obtain a free, no obligation quote on all of your insurance needs!
